CONTENTS

7 **Ferrous metallurgy – thriving in Wales** B. Wilshire

10 **EngD degree at SERC Parnaby Doctorate Centre (Wales)** D. T. Llewellyn

27 **Development of new alloy steel grade which facilitates elimination of process annealing** Hong-Rong Lin and Yung-Kun Chen

32 **Finite element modelling of hydraulic bulging during sheet metal forming** R. J. Cronin, J. Y. Xia, and D. T. Llewellyn

37 **Water modelling to aid improvement of degasser performance for production of ultralow carbon interstitial free steels** R. K. Hanna, T. Jones, R. I. Blake, and M. S. Millman

44 **Mathematical model for tall coke oven battery: Part 3 Integrated model and its application** P. V. Barr, E. J. Osinski, J. K. Brimacombe, M. A. Khan, and P. J. Readyhough

56 **High temperature behaviour of selffluxed pellets during heating up reduction** J. V. Khaki, Y. Kashiwaya, and K. Ishii

64 **Effect of plasma on offgas produced in CO_2–O_2 coal gasification process** A. M. Alfantazi and C. A. Pickles

73 ***Technical note*** **Effect of technological factors on rolled metal quality** V. Bobrov

82 **Materials science and technology databases online and on CD-ROM** J. Feldt

87 **Role of steel in fuel efficient cars** A. Matthews

93 **Technology management in the steel industry: current challenges** J. J. Irani

101 **Design and construction of lining of no. 4 blast furnace, Port Talbot Works** J. L. Evans

114 **Non-isothermal conditions inside magnetite pellet due to its oxidation by air** J. C. Ruiz Sierra, J. M. Badie, and F. Chejne Janna

119 **Thermal analysis of sintering of magnetite pellets** S. Ferreira, D. Siguín, and F. García

124 **Consecutive reversible first order two stage reaction model for reduction of Cr_2O_3** S. Simukanga and R. J. Pomfret

131 **Kinetics of alkali release from CaO–Al_2O_3–SiO_2 slags** B. S. Terry and G. R. Asjadi

140 **Effect of presence of carbon, iron, and sulphur on rate of alkali release from CaO–Al_2O_3–SiO_2 slags** B. S. Terry and G. R. Asjadi

145 **Reduction of fluorspar consumption in secondary steelmaking** T. S. Tribe, P. W. Kingston, J. B. MacDonald, and W. F. Caley

150 **Optimum ladle design for heat retention during continuous casting** B. Barber, G. Watson, and L. Bowden

154 **Failure of work roll of cold rolling mill** A. N. Sinha and C. S. Sivaramakrishnan

158 ***Short communication*** **Another look at Fe–O–S diagrams** M. H. Shariat and S. A. Behgozin

182 ***Presidential Address*** **The way forward** G. Allen

191 ***SMEA Celebrity Lecture*** **The changing world of steel** B. Moffat

209 **Application of electron backscatter diffraction to steel products** V. Randle

215 **Structure–property relationships in ferrite–pearlite steels** B. Mintz, G. Peterson, and A. Nassar

223 **Effect of short time high temperature annealing on kinetics of carbidic reactions in 2·7Cr–0·6Mo–0·3V steel** V. Magula and J. Janovec

229 **Nature of cohesive zone in blast furnace** N. J. Busby, T. A. T. Fray, and D. C. Goldring

237 **Non-isothermal kinetics of iron ore reduction** S. Prakash

244 **Influence of temperature and additives on ferrous ion content of pyroconsolidated pellets** S. Ferreira, D. Siguín, and F. García

247 **Low phosphorus basic oxygen steelmaking practices in British Steel** G. Thornton and D. Anderson

262 **Computerised materials databases and systems** W. G. Jackson

279 **Thermal properties of slag films taken from continuous casting mould** M. Susa, K. C. Mills, M. J. Richardson, R. Taylor, and D. Stewart

287 **Mathematical modelling of refining of stainless steel in MRPA converter** C. Vercruyssen, P. Wollants, J. R. Roos, D. G. C. Robertson, and L. Bertels

297 **Effect of gas flow on simultaneous carburisation and reduction of iron ore** M. Motlagh

303 **Calcium carbide powder injection into hot metal: Part 1 Heat transfer to particles** Y.-F. Zhao and G. A. Irons

309 **Calcium carbide powder injection into hot metal: Part 2 Simultaneous desulphurisation and deoxidation** Y.-F. Zhao and G. A. Irons

318 **Dissolution of MgO in stagnant CaO–FeO–SiO_2 slags** J. Bygdén, T. DebRoy, and S. Seetharaman

324 **Electroslag remelting of Fe–28 at.-%Al intermetallic alloy** R. G. Baligidad, U. Prakash, V. Ramakrishna Rao, P. K. Rao, and N. B. Ballal

345 **Warm worked Esshete 1250: a high strength bolting steel** J. Orr, H. Everson, and G. Parkin

353 **Evaluation of Carol Lake concentrate as mix component at Bethlehem Steel's Sparrows Point sinter plant** S. C. Panigrahy, M. A. J. Rigaud, and G. S. Hegedus

362 **Kinetics and mechanisms of calcium dissolution and modification of oxide and sulphide inclusions in steel** D.-Z. Lu, G. A. Irons, and W.-K. Lu

373 **Fundamental processes in bath smelting: reactions of iron oxides with Fe–C melts** G. G. Krishna Murthy and J. F. Elliott

380 **Modelling of nugget formation on tuyeres during submerged gas injection into steel melts** K. Datta, A. Biswas, and A. Chatterjee

390 **Application of mould thermal monitoring on the two strand caster at Sidmar** F. Haers and S. G. Thornton

399 **Development of ultrahigh strength steel through electroslag remelting with inoculation** M. Chatterjee, M. S. N. Balasubramanian, K. M. Gupt, and P. Krishna Rao

431 ***Keynote address*** **The use of composites in marine environments** R. S. Dow and J. Bird

445 ***Keynote address*** **Steel–concrete composite construction: behaviour and opportunities in the marine environment** G. W. Owens

452 ***Keynote address*** **Steel – a versatile advanced material in marine environments** J. Billingham

459 **Improvement of drawability of steel rod for CO_2 solid wire** Hong-Rong Lin

465 **Characteristic phenomena observed during rolling by pair crossed mill** S. Omori, H. Hino, and H. Goto

472 **Improvement in measurement of moisture and volatile substances in coke used in sintering by means of neutron probe–electric probe system** A. Formoso, J. Mochón, M. Sirgado, and A. Cores

479 **New MgO–CaO based reagent for ladle treatment of steel** J. T. Haddock, I. Hussain, A. G. Fox, J. K. Batham, and E. T. R. Jones

487 **Improving inner quality in continuously cast billets: comparison between mould electromagnetic stirring and thermal soft reduction** C.-M. Raihle, P. Sivesson, M. Tukiainen, and H. Fredriksson
